Known Issues, Sumo22

- Don't use "Overwrite all initial conditions with current values" from the Advanced menu on projects build with biofilm units. **→ Fixed in 22.1.0**

- For Boolean parameter inputs (e.g. SRT control), text entries are not accepted. Just type 0 for FALSE and 1 for TRUE. **→ Fixed in 22.1.0**

- When modeling HPO systems, the low pH limit needs to be raised to inhibit nitrification, as there is a lot of bicarbonate (substrate) available even at lower pH values. **→ Fixed in 22.1.0**
