Sumo22 End User License Agreement

Dynamita SARL 2011-2024

Please read this document carefully before using Sumo.

It tells you that Dynamita owns the rights to Sumo, that you can use it under the agreed conditions, and that Dynamita's liability is limited.

If you use Sumo, you acknowledge understanding this information and agree to these conditions.

The IP and copyright belong to Dynamita SARL:

Dynamita certifies that it owns all rights to the Sumo software. Supporting software (such as operating system, Excel, 3rd party libraries and others) are required and are the responsibility of the user.

Dynamita gives you the right to use it:

In exchange for the agreed compensation and in accordance with agreed terms, Dynamita provides the license to you to use Sumo for its intended purpose. If you have a license, it can be used worldwide (e.g. network licenses).

Specifically, if this instance is a research or academic license, commercial (for-profit) use requires an additional commercial license.

We make our best effort for Sumo to work properly:

Dynamita uses its best judgement, best coding practices and best available information at the time of the preparation of the software and strives to fix any bugs that may slip in inadvertently in the shortest time possible.

Our liability is limited:

Dynamita is not responsible for any damages which are caused by the proper or improper use of this software or by not using the software. In any event our liability is limited to the amount of license fee paid by the user in the time period (usually one year) concerned.

If the license you purchased is an academic license, that copy is only for educational purposes. Any paid research or commercial use requires a separate license and payment.

By using Sumo you agree that we can display your company name as reference on our website and in marketing material - please email us if you don't agree to this and we will respect your decision.

Sumo22 uses the following supporting software elements:

Microsoft Excel
Open XML SDK
Qt 4.8 libraries
MinGW compiler
GNU C++ libraries
sundials libraries
Radau code from E. Hairer and G. Wanner, ported to C++ by Blake Ashby

Licensing information for these packages:

Microsoft Excel - commercial product, paid license with Microsoft required

Open XML SDK

http://msdn.microsoft.com/en-us/library/bb448854.aspx - look for copyright notice:

http://msdn.microsoft.com/en-us/library/bb509417.aspx

Qt libraries use LGPL 2.1

http://www.gnu.org/licenses/old-licenses/lgpl-2.1.html

GNU C++ libraries

GPL3 with the addition under section 7 of a GCC Runtime Library Exception, version 3.1

http://gcc.gnu.org/onlinedocs/ -> ∘GCC 4.6.2 Standard C++ Library Manual

MinGW (can be redistributed without modification)

http://www.mingw.org/license

sundials libraries

http://computation.llnl.gov/casc/sundials/download/license.html

Radau code

(C) 2002 Blake Ashby, bmashby@stanford.edu

original Fortran code (C) 1996 - E. Hairer and G. Wanner
